

Younsu Kim

Summary

Ph.D candidate in the field of Computer Science with bachelor's and master's degrees in electrical and computer engineering. Strong communication skills developed through various project collaborations and multicultural experiences. Adept at working independently or as part of a broader team in various industry and academic settings.

Development experiences Software & Hardware product development, Deep learning, Machine learning, Computer vision, Data analysis, Algorithms, Optimization, Sensors, Image and Signal processing.

Research projects Ultrasound thermal monitoring using deep learning approach, Single-element ultrasound imaging, Device tool tracking.

Education

- 2014–current **Johns Hopkins University, Baltimore, MD, USA** *PhD Program in Computer Science.*
- Served as research assistant across multiple topics including ultrasound thermal imaging, single-element imaging and surgical tool tracking.
 - Developed software and implemented new ultrasound thermal monitoring algorithms using computational bioheat model and deep learning approaches.
 - Developed a system to evaluate ultrasound-guided navigation system and improved a MCU-based system.
 - Designed system architectures to perform experiments for thermal monitoring and single-element ultrasound imaging.
 - Played a pivotal role as a member of MUSIIC research group at Johns Hopkins university in spearheading collaboration efforts with other members and advising undergraduate and upcoming PhD students.
 - Courses : Computer vision, Deep learning, Machine learning, Parallel Programming, Operating Systems, Computer Networks, Algorithms, Database Systems, Computer Integrated Surgery, Medical Imaging Systems, Optimization Algorithms.
- 2008–2009 **Johns Hopkins University, Baltimore, MD, USA** *Masters in Electrical and Computer Engineering.*
- Research Projects : Time-reversal ultrasound imaging system, biomorphic CMOS imagers and Bioamplifiers.
- 2004–2008 **Tsinghua University, Beijing, China** *Bachelor 's in Microelectronics and Nanoelectronics Engineering.*
- Thesis : High-resolution Digitally Controlled Oscillator for Next Generation Wireline Applications.

Work Experience

- Dec 2013 – **Korea Electronics Technology Institute IoT Convergence Research Center.** Gyeonggi, Korea.
- Feb 2014 Research Engineer.
- High-speed Computational Fluid Dynamics Simulation of Coronary Artery using GPUs.

- Nov 2009 – **LG Electronics, Inc R&D/Advanced Technology Division**. Seoul, Korea. Research Engineer.
- Mar 2013 - Developed motion sensor-based remote control as a key hardware and firmware engineer, including chip selection, main board design and firmware development.
- Led the division's software research efforts on multi-view 3D Auto-stereoscopy TV, developed head tracking system for 3D TV without glasses.
 - Conducted training and seminars for division's executives on underlying principles of new technologies.
 - Led the division's expansion initiative on the Chinese market by designing customized TV mainboard and evaluating on-site mass production with technical trouble shooting capabilities.
- Jul 2007 – **Samsung Electronics, Inc Telecommunication Research and Development Center** Beijing, China
- Aug 2007 Research Intern.
- Developed mobile applications in the Research and Strategy Group.

Skills & Techniques

Programming Languages Python, C/C++, Matlab, Java, SQL

Tools Deep learning (Pytorch, Tensorflow, Keras), Hardware development tools (Zuken)

Languages

Korean Native Speaker

English Full professional proficiency

Chinese Full professional proficiency

Patents

- Three-dimensional real time ultrasound monitoring system for ablation therapy, (Filing) 2018
- System for generating synthetic aperture ultrasound images during needle placement, PCT/US2017/030660, WO2017192603, 2017
- Multimedia device for communicating with at least one device and method for controlling the same, 1020140029810, Korea, 2014

Awards

- SPIE Best poster award, 2019. (Deep learning image reconstruction for limited-angle ultrasound tomography in prostate cancer.)
- SPIE Honorable Mention award, 2019. (Conformal radiofrequency ablation to validate ultrasound thermometry.)
- IEEE International Ultrasonics Symposium Student Travel Support, Competitive basis, 2018. (Low-cost ultrasound thermometry for HIFU therapy using CNN.)
- SPIE Medical Imaging Young Scientist Awards, Runner-up, 2017. (Toward dynamic lumbar punctures guidance based on single element synthetic tracked aperture ultrasound imaging.)
- Dean's Merit Scholarship for MSc students , 2008 - 2009

Teaching

- Course Assistant - Machine Learning : Data to Models, 2019.
- Head Teaching Assistant - Database Systems, 2017.
- Course Assistant - Computer-Integrated Surgery, 2016, 2019
- Head Teaching Assistant - Computer System Fundamentals, 2014.

Extracurricular Activities

| | |
|----------------------|---|
| Student associations | Served as a board member at Johns Hopkins and Tsinghua university |
| Sports clubs | Led golf, ski clubs at Johns Hopkins and Tsinghua university |
| Ski | Certified Official Ski Instructor level 2 at Korean Ski Instructors Association |

Projects & Publications

2014 – **Ultrasound thermometry.**

- current
